CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the findings and discussion presented in Chapter IV, the writer conclude that the function is not only for the guest who wants to stay but also for education especially in supporting learning activities in SMK Negeri 6 Palembang. The students of SMK Negeri 6 also agree with existence the Edotel that gives influnce as a supporting their activities because it make them easily and more understand how to face the guest before they have on the job training in a star hotel.

This hotel used by students to practice and apply their skill because it is not enough if they just study in the class so that they need to practice. They have to practice about how to service the guest in Edotel because they will have training in hotel, so when they come to the real hotel and face some guests with different characters they already know what they have to do. The most important, if they have learned and practice in Edotel, they will be more ready to have on the job training in hotel.

5.2 Suggestion

The writer suggest that the Edotel should increase the operational system and service must be better. The students should be more dilligent and keep learning about the hotel in order to they become a professional worker especially in hotel field.
