5.1 Conclusion

In writing the video script of Masjid Al-Mahmudiyah (SURO) as a religious tourism destination in Palembang, the writer used the stages of Research and Development modified by Sukmadinata, et al (2006: 169-170). The stages are preliminary study, development of the product and final product testing. First, the writer used two steps. Those were the interview and the documentation. The data was collected by interviewing experts in their respective fields and taking videos or photos about Masjid Al-Mahmudiyah (SURO). Second, in Model Development, the writer conducted the limited testing and wider testing. In limited testing, the writer assisted three experts to ask for their comment and suggestions for each aspect such as video, content and script.
