

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **5.1. Conclusion**

Bukit Besak has potential as a nature tourism destination. The potencies are divided in two groups. First, on the way to the top of Bukit Besak there are suspension bridges, river, rice fields, coffee plantations, and hiking trails. Second, on the top of Bukit Besak there is a beautiful sunset or sunrise, view of Bukit Jempol, the land above the clouds, and green savanna. Then, public facilities have garbage bins, toilets, a basecamp, parking areas, registration counters and canteen. Bukit Besak also provides accessibility and infrastructure towards the destination to make it easy to get to the location, accessible by private transportation. Providing basic infrastructure like bridges make a great impact on access roads to reach destinations easily, smooth asphalt roads also there is one hotel near the location which can support the hospitality of Bukit Besak.

#### **5.2. Suggestion**

Based on the conclusion, the writer suggests the management of Bukit Besak to keep improving the facilities such as repairing the things that should be repaired such as repairing the iron ladder on an incline where there is damage in some parts. Also, must add adequate parking areas and widening the road. It will make the arrangement of space become more neat and organized so cars can freely cross each other.
