# CHAPTER V

## CONCLUSION AND SUGGESTION

In this chapter, the writer presents conclusion and suggestion after conducting the research.

### 5.1 Conclusion

The writer concluded that there were three steps in designing a video script to promote Sultan Mahmud Badaruddin II Museum. The stages written by Ranga and Koul (2017) were in line with the stages of Research and Development method by Sukmadinata (2019). The first step was preliminary study, with the ideas; finding idea, creating brief plan, researching, selecting, planning, arranging, and drafting video script. The next step was model development, which was related to revision. The writer did limited testing to validate and develop the product. There were two aspects tested in limited testing, which were content and language of the video script especially its grammar. The next testing was wider testing, in which there were three aspects being tested. The aspects were language including grammatical error and diction, content arrangement, and format of writing video script. The last step was final product testing and dissemination which related to final draft. The writer considered the result from wider testing as the final product due to the writer's limited time of conducting the research.

### 5.2 Suggestion

Based on the research the writer did, she would like to give suggestion to the future researcher and student of English Department at State Polytechnic of Sriwijaya. For future researcher, the writer suggested to conduct the research and development until final product testing and dissemination. Moreover, the writer also suggested the student of English Department at State Polytechnic of Sriwijaya to design a video script about other cultural tourism destinations in Palembang.
