

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter presents the conclusion and suggestion based on the result of the research and development.

#### **5.1 Conclusion**

From the explanation in the previous chapters, the writer concludes that there are three steps in writing a video script of Man Sahmin as Palembang traditional cake by Friedmann (2014) that in line with Research and Development by Sukmadinata (2005). The first step is Preliminary Study that can be cooperated with the idea of script development by Friedmann. The ideas are background research and investigation, concept, treatment and first draft. The second step is Model development conducted with revision. The writer did limited testing to make product developed. There were three aspects tasted by three experts in limited testing. The aspects were about the content of video script, word choices errors, and detail explanation in Indonesian script, and grammatical errors, diction, and coherence in English script. Then, the writer revised the video script. After that, the writer did wider testing. The writer asked the comments and suggestions from two experts about content of script to improve the video script. The last step is Final product testing connected with final draft. This is the last stage of research and development modification steps, it consists of pre-testing, revision, and dissemination. Pre-testing is the last revising steps from the wider testing, while dissemination is the writer trying to promote the product to society. Unfortunately, the writer did not do the pre-testing, revision, and dissemination steps because of the lack of cost, time, skill, and legality.

#### **5.2 Suggestion**

This product does not complete yet because of the lack of fund, time, and legality. Therefore, the writer suggests conducting pre-testing, revision, and dissemination for future researcher. Also, the writer suggests to student of English Department at Polytechnic of Sriwijaya to preserve more about other Palembang Traditional cakes.
