CHAPTER V
CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the explanation in the previous chapters, the writer can conclude that Hymes' Framework SPEAKING model can be used in the speech event such as a wedding speech. As the data of this study showed, that there were some speaking factors affecting each speech event which are in line with Hymes' (1974) SPEAKING model such as setting and scene, participants, ends, act sequences, keys, instrumentalities, norms, and genre are used in each speech. It has the results that there are differences and similarities from the four samples of wedding speeches after the writer analyses the wedding speech using Hymes' Framework SPEAKING model. It showed that the most dominant difference is setting and scene, such as there are parents next to the bride and groom when they give speech in wedding speech and the podium. And the most dominant similarity is Genre, such as speech.

However, some typical speech events, due to the situational and contextual context of language, were found more frequently than others; in the each sample of wedding speeches, the most recurring event in a speech of thanks and hopes for their wedding in the future was found to be confiding all big family and all people they beloved in order to feel also the happiness from their wedding.

5.2 Suggestion

The writer suggests that the speaker of wedding speech in order to give a speech should use SPEAKING model because to speak in public should consider to linguistic components. So, when the speaker delivers a speech well and correctly in accordance with the Hymes' Framework. For the readers, this study could be a sample to make familiarize with culture which is an important part of language learning process, so it could improve communicative competence and talk more appropriately in related context.
