ABSTRACT

This study aims to examine how the implementation of excellent service by PT. Al Shafwah Wisata Mandiri (Smarts Umrah Sumbagsel) enhances the satisfaction of Umrah pilgrims, as well as to identify the challenges encountered in its execution. The research employs a descriptive qualitative approach, with data collected through interviews, observations, and documentation. The analysis method is based on the Miles and Huberman model of qualitative data analysis. The findings reveal that the company has applied the concept of excellent service based on the A6 principles (Ability, Attitude, Appearance, Attention, Action, Accountability). However, certain obstacles, such as delays in delivering pilgrims' luggage upon return, have negatively affected satisfaction. Nonetheless, the majority of pilgrims expressed satisfaction with the services provided, particularly in terms of staff friendliness, clarity of information, and comfort of facilities. It is recommended that the company improve its logistics system and provide internal training to minimize operational issues in the field.
