

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

After analyzing Ariana Grande's 13 song lyrics from the *Eternal Sunshine* album, the researcher concluded that figurative language is important in conveying messages that are not explicitly stated to the listener, the goal is that the listener gets the opportunity or space to understand the meaning of the song lyrics. The album '*Eternal Sunshine*' provides a clear insight into Ariana Grande's love journey. Researchers found that there are 111 data with 11 types of figurative language used in Ariana Grande's song lyrics from the *Eternal Sunshine* album, these included 29 metaphors, 9 metonymies, 9 personifications, 10 similes, 6 litotes, 9 paradoxes, 16 hyperboles, 6 instances of parallelism, 1 anaphora, 8 repetitions, and 8 ironies. The most important or dominant type of figurative language is metaphor. Metaphor is defined as the use of words or sentences that do not have their actual meaning, but rather as images based on similarities or comparisons (Apriliyanti, 2023). By using metaphor, Ariana can convey a deeper message and help in expressing feelings more interestingly and beautifully.

There are 2 types of figurative language that researchers cannot find in this study, the 2 figurative languages are synecdoche and alliteration. Researchers could not find these two figurative languages because the lyrics in Ariana Grande's song *Eternal Sunshine* do not have any suitability or characteristics related to the synecdoche and alliteration language styles. The lyrics in Ariana's song are more about her personal experience, so it is possible to reduce the use of synecdoche and alliteration that are not implied in the lyrics of the song.

5.2 Suggestion

Based on the conclusions the researcher wrote from this study, the researcher hopes that future research on figurative language analysis will expand this analysis from songs in various genres. Future researchers are expected to

analyze not only songs but also poems, films, podcasts, and video content from various social media platforms in order to gain a broad understanding and insight into analyzing language styles from different forms not only songs.

This research focuses on analyzing the types of figurative language, explaining the implied meaning and looking for the most frequently used or most dominant figurative language in Ariana Grande's song lyrics from the *Eternal Sunshine* album. For other researchers who have the desire to conduct similar research, they can look for other figurative language on objects that are different from this research.
