

CHAPTER V

CONCLUSION AND SUGGESTIONS

In this chapter, the writer presented the conclusion and suggestions.

5.1 Conclusion

Based on findings and discussion, the writer concluded that in the guidebook of Sultan Mahmud Badaruddin II Museum 2008, there were some errors found within it. Types of error found were omission, addition, and misformation. The most dominant kind of error found was misformation error. The errors could happen because the lack of knowledge about English grammar. This could also be caused because of the first language of the author. The author probably translated the first language into target language word by word.

5.2 Suggestions

The writer would like to suggest the staff of Sultan Mahmud Badaruddin Museum to improve the Guidebook of Sultan Mahmud Badaruddin Museum better with the right grammar in order to make the local or foreign visitors understand the information of collections in the museum easily. Therefore, the image of tourism objects in Palembang would be better too and could compete with another tourism objects in another countries.
