

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusions

Balai Penelitian Sembawa has potency to be developed as agro-tourism in Banyuasin Regency, the potency has actually been accompanied by the supporting factors such as adequate land resources, adequate infrastructure and facilities, human resources and the efforts of nature conservation and preservation.

Balai Penelitian Sembawa has adequate land resources because there are adequate areas of plantation and educational activities. Balai Penelitian Sembawa is also supported by adequate infrastructure such as a good access of roads, transportation and strategic location. It is also supported by agricultural facilities, accomodation, entertainment facilities and public facilities.

However, there are so many other potency of Balai Penelitian Sembawa that can be developed and also other aspects that must be improved such as guest houses facilities that must be added, there must have special transportation for area of Balai Penelitian Sembawa, improvement of roads and also the roles of all the staff and communities of Balai Penelitian Sembawa in developing Balai Penelitian Sembawa as a main sector for agro-tourism

5.2 Suggestion

Based on conclusion above, the writer suggests that improving the infrastructures, facilities and human resources in order to increase the quality of service for the guests and start developing Balai Penenlitian Sembawa as agrotourism and the writer hope that Balai Penelitian Sembawa will preserve the attractions they have.
