## ABSTRAK

Koperasi Simpan Pinjam pada kantor UPTD Balai Perlindungan Tanaman yang di dirikan untuk membantu karyawan pada kantor UPTD yang kekurangan modal untuk mengembangkan usahanya dan keperluan lainnya. Tujuan penulisan laporan ini adalah untuk dapat membantu mempermudah dalam pengolahan data simpan pinjam yang baik dan berguna bagi koperasi tersebut. Masalah yang didapat dalam proses pengolahan data simpan pinjam masih sederhana dan tidak efisien. Data dikumpulkan dari pengamatan langsung dan wawancara dengan staf Koperasi Simpan Pinjam pada kantor UPTD Balai Perlindungan Tanaman. Data analisa dengan menggunakan teori yang dikembangkan oleh Jogianto (2008), dan Sutabri (2012), pengolahan data di Koperasi Simpan Pinjam pada Kantor UPTD Balai Perlindungan Tanaman masih sederhana dan membutuhkan waktu yang lama dalam proses pencarian datanya. Disarankan untuk menggunakan *PHP* dengan database *MySQL* karena hal ini akan menghemat dalam hal pengolahan data, mempermudah poses pencarian data dan mempermudah karyawan dalam melakukan simpan pinjam.
