

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

The writer concludes that the public facilities that are provided in Balaputra Dewa museum are *toilets, canteens, mushola, and parking lot*. The public facilities in Balaputra Dewa museum are incomplete and they still have many deficiencies. Some of the public facilities in Balaputra Dewa museum are not of the standard of tourism and not in a good condition. For the toilet, there are some water taps which are broken and in the toilet there are some graffiti in the wall. For the canteen, the condition of the canteen is not good because the canteen is in the outdoor, and only made by wood. For the other facilities such as mushola and parking lot, the condition is good of the standard for tourism.

5.2 Suggestion

The writer suggests that Balaputra Dewa museum has to improve its public facilities. First, the staff of Balaputra Dewa museum should do the maintenance and repair the public facilities that are broken. Second, the government must give more attention about the public facilities which are in the museum and give more budget to repair the public facilities in the museum in order to make the visitors feel comfortable and enjoyable when visiting the museum.
