

## **CHAPTER V**

### **CONCLUSIONS AND SUGGESTIONS**

#### **5.1 Conclusion**

Research and Development modification method based on Sukmadinata (2005) that consists of preliminary study, model development and final product testing really helped the writer in designing a website entitled “*Website Informasi untuk Backpackers/Information Website for Backpackers*”. The writer

The website can be accessed at [www.gopalembang.com](http://www.gopalembang.com). This website can be a medium to deliver information about tourism destinationS, accommodation and culinary tourism in Palembang for the readers especially backpackers. By visiting this website, the viewers can get the information about what to see in a place, where to stay, how to travel around, where to eat, how long it takes to go somewhere, and how much it costs.

Designing the informational website could be done by designing a simple blog first and making the website more interesting by using some features, so it can attract many visitors to read the information in the website. In finishing this website, the writer needs some skills and knowledge including Indonesian and English language, website design and Photoshop and Photoscape application and information on tourism destinations, accommodations and culinary tourisms.

#### **5.2 Suggestion**

The contents of the website for guiding backpackers are incomplete. The writer suggests to the future researchers to design the website with more complete information by adding the map of each tourism destination and estimation budget to do backpacking in Palembang.
