

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter presents about the conclusion and suggestion of the final report.

#### 5.1 Conclusion

In this report, the writer used Curup Buluh waterfall as the place of research. Curup Buluh waterfall has a beautiful nature view. The writer found that Curup Buluh waterfall is the only waterfall which has the widest area in Lahat Regency. So that is why it is suitable for family recreation activities. Curup Buluh waterfall is managed by society organization in Lubuk Selo village called as *Pokdarwis Kalpataru Cahaya Harapan*. All the contribution fee from Curup Buluh waterfall is under the village administration and village regulation. It has already approved by the head of the village and the ministry of tourism about *Pokdarwis* in Indonesia. The writer decided to design a booklet of Curup Buluh waterfall in order to make society more conscious about the existence of this gorgeous waterfall.

The writer draws the conclusion that Curup Buluh waterfall booklet has much information such as the map of the location, price of entrance ticket, the price of parking fee, opening hours, the legend of Curup Buluh, the past and present of it, the route to it, the activities that can be done there, the facilities and others. In designing booklet of Curup Buluh waterfall, the writer used modified Research and Development method. There are three steps of Research and Development used by the writer to get the best result of designing booklet. They are: (1) Preliminary Study: a. Literature Study, b. Field Survey, c. Draft of Product, (2) Development Product: a. Limited Trial, b. Wider Trial, (3) Test: a. Pre Test, b. Revision, c. Post Test.

In literature study, the writer read the literatures review about designing booklet and Curup Buluh waterfall booklet. Based on observation or field survey done, the writer found that there was no booklet that specially explains about

Curup Buluh waterfall so the writer decided to design a booklet about Curup Buluh waterfall. In development step, the writer asked four experts for suggestions of the booklet draft. The, the writer revised the booklet based on the experts' suggestions. In test step, the revised booklet was commented by two more experts. The experts' valuable comments are used to revise the booklet and make the final booklet. The booklet provides two different language versions, English and Indonesia. The booklet was design in A5 paper size and it has 25 pages.

## 5.2 Suggestion

Based on the result of designing booklet of Curup Buluh waterfall that has been done, the writer suggests some suggestions as follows :

1. The writer suggests the government of Lahat Regency to take full part in developing the facilities in Curup Buluh waterfall area. Because, we can see that the facilities in Curup Buluh waterfall now are not proper enough to support the the potency of Curup Buluh waterfall. For examples the toilets, the Mushola, the stall, the chair, and others. It will be better if the government of Lahat Regency in collaboration with *Pokdarwis Kalpataru Cahaya Harapan* Lubuk Selo village together build and develop all supporting facilities in Curup Buluh area to make the place more comfortable to be visited by the visitors.
2. For further research better booklet should be made for other tourism destinations clearly and completely. The next writers have to develop the creativity, innovative thought and technology to make some improvements of tourism industry sector and also make some new products to be developed. The writer hopes that this booklet will give a good impact to the all parties.
