

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter presents the conclusion and suggestion of this final report.

#### **5.1 Conclusion**

The following are the steps in writing short story using Research and Methodology method modified by Sukmadinata (2015). The steps are Preliminary study, development of the product, and final product testing. Based on the writer did literature study, the short story should be short usually between 500 and 2000 words in length, has a one plot, made the outline of the short story, decide the elements of short story such as characters, plot and setting and read some short story from the famous author are needed. For development of the product, the writer requested some comments and suggestions from the experts to improve the short story. Finally. The writer did final product testing to make a final product. The writer asked for comments from an expert in short story. The expert stated the writer should add the characteristic of characters in that story to make it clear. The writer followed all the suggestions and wrote the final short story as the final product.

#### **5.2 Suggestion**

The writer expects the future researchers to use the dissemination step in order to make the products better.
