

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter represent about the conclusions and suggestions of the final report.

5.1 Conclusion

The magazine entitled “Smart magazine” can be used as a new innovation writing medium and English Department students can show up their writing skill. In making the magazine, the writer used Research and Development (R&D) method with three steps; preliminary study, model development, and final product testing. In the preliminary, the writer read information about how to design magazines and collected information for magazine draft. The writer used *Pedoman Mahasiswa* and short story and poem from English Department students and interviewed English Department Alumnus and Polsri students who had good achievement. The writer started make a them all of the info was analyzed edited design draft applied CorelDraw X7.

In the process of the magazine development, the comments from the experts’ in the limited field testing and wider field testing are really needed. They were a English aspect and design aspects. The English aspect in limited field testing commented that some uses of the language was too old for youngster, and uses some slangs language from Editor’s Voice. There are grammar mistake in Editor’s Voice. In the wider field testing English aspect suggested to change the grammar and vocabulary used especially in part of speech and try to choose the better word for make a sentence. And other hands. The design aspects in limited filed testing suggested was background change of Fiddle Fit rubric. There were two things to consider, the color selection should be softer than the previous color. In wider field testing design

aspects suggested to find the colorful background for editor's voice and to change the layout for the *contents*, to make the body text of content more colorful and to add pictures based on the rubric.

The last steps in final product testing they were English aspect and design aspect. After being revised, the writer made the final product of the "*Smart*" magazine has 32 pages that be some of printed media that can be used for English Department students at State Polytechnic of Sriwijaya as the one of learning English aids.

5.2 Suggestion

Based on the result of designing a *Smart* magazine for the students association at English Departement of State Polytechnic of Sriwijaya. There are suggestion for future researchers who want to design the similar magazine need to complete and collect early the information and then to take better pictures of the contents.
