

CHAPTER V

CONCLUSION AND SUGGESTIONS

This chapter presents the conclusion and suggestions of Designing Video Script of Mousse with Rosella as Natural Dyes.

5.1 Conclusion

In the process of making video script, the writer used various steps to obtain a good final report. The writer has already done limited field testing and wider field testing for about 1 month. In limited testing, the writer asked expert of linguistics about the script of making mousse with rosella as natural dyes. After revised some mistakes based on the expert's suggestion in limited testing, the writer asked the other expert of linguistics in wider testing to correct some errors on script. After consulting the scripts with all experts, the writer finally got the perfect script. Then, the results of the script are realized in the form of video as nurturant effect. Also, as a result of scientific research, the writer has an obligation to share the writer's knowledge to public. Therefore, the writer uploaded the video of making mousse with rosella as natural dyes through You Tube as the dissemination of this research.

5.2 Suggestion

The writer suggests other students to continue developing new ideas about making natural dyes for food. The writer also suggests for food sellers to sell the food with natural dyes to maintain the stability of the consumer's health. Moreover, for public, the writer suggests to watch the video before making mousse to get information about the ingredients, tools, and also the steps of making mousse and natural dyes from rosella.
