The second step is model development conducted with revision. The writer did limited testing to make the product developed. There were three aspects tasted by three experts in limited testing. The aspects were about the content of picture storybook, languages, and also picture design. Then, the writer revised the video script. After that, the writer did wider testing. The writer asked the comments and suggestions from three experts about the picture storybook. The last step is the Final product testing connected with the final draft. This is the last stage of research and development modification steps, it consists of final product testing, revision and dissemination.
