

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and suggestion of this final report.

5.1 Conclusion

Based on the explanation on the previous chapter, it can be concluded that there are 3 steps in designing the recipe book of food and drink made from peanut. The following are the steps of designing recipe book of food and drink made from peanut using methodology of Research and Development by Sukmadinata (2005). The steps are preliminary study, model development and final product testing.

In the first step, the writer found informations about recipe book from some journals as the content of recipe book, and the writer also found some informations designing recipe book. Then, the writer designed the first draft of recipe book.

Next, in the second step writer did limited testing to make the product developed. The writer asked for comments and suggestion from the experts of design and the recipe of the menu. The writer got information about how to design the recipe book, the tips of making recipe book, and information about the recipe book's content. The writer found that there was no recipe book about food and drink made from peanut in Palembang whereas it needed to be promoted. In collecting the data the writer analyzed some website, recipe book, about brownies, pudding, and milkshake. The writer asked for comments and suggestion from the experts of grammatical errors and designer of the recipe book. The grammar expert stated that the sentences of the recipe book there some structural grammar problems and miss typed in the script, so the writer were fixed all the problems. Then, the product target is designer of the book stated that the background already good, and the content was very informative and very interesting, so people would be interested in reading the recipe book. The writer followed all the comments and suggestions from the experts.

In the last step, the writer did the wider testing to make a final product. The writer asked for comments and suggestion from designer of book expert. He suggested that the colors of background has been matched with the color of fonts. Then, he also commented about the fonts can be read clearly. And the last, he added that every pages should have number of pages. The position of the page in the right or the left, it must be consistent, and not to put the number of pages on the center. So, the writer should fix the design based on his suggestion. Then, the expert stated that the recipe book was good and a good quality of recipe book such as the recipe book elements, also the matched color in the recipe books.

5.2 Suggestion

The writer suggests to further researchers is designing a recipe book about food and drink besides made from peanut. It is also recommended to make the recipe book with the equipments, ingredients, how to make it, also the interesting picture because script is there are element in producing the recipe book.

For further development, it is expected to have other innovation in food diversification using other alternative local ingredients. It also expected that the booklet would be published in other languages to increase readers from other countries understand about these experiments.

For students of English Department, the writer suggest to develop the idea about Indonesia especially Palembang because Indonesia has a lot of tourism potential. Then, find other media in order to promote the tourism potential in Indonesia especially Palembang because it is not limited by recipe book.
